Remote Ham Radio Operations – It's In My Future... But what's the "best" way for me?

This presentation will cover the how and why of remote HF operations and why they are used. For DX with big antennas, For HOA Trapped Hams – For older hams who have "downsized". We will discuss four of the many ways that this can be accomplished their pros and cons:

- The "for profit" Big Gun stations
- Remote Hams software based remote systems
 - Remote Rig and K3/0 systems
- The Flex Radio "built in remote" systems

Power point and also live demonstration of two of the four solutions (Remote Hams and Flex Radio) will be shown. You will not want to miss this!
