

TARCTALKS

Moon Bounce (EME) Our Guest: Jim Huhta; AA4MD

**Monday, Sept. 21st;
8:00 PM (Note: New Time)
Virtual via Zoom**

The problem with EME is that the Moon is 248,548 miles away; the moon is a poor RF reflector and the moon is in motion so it has to be tracked.

Jim will share with us how he does it. Not only once but he has made over 400 QSO's to 32 different countries using Moon Bounce

This is a TARCTalks you will not want to miss.
